My/Public Charger Combination Panel

For safe use of our Tunçmatik AC Public Charger and AC Home Charger models, a combination panel can be preferred. The combination panel contains one 4-pole 40A 30mA residual current device and one 3-pole circuit breaker. Thanks to its IP44 protection class, it can be used outdoors. Designed for wall mounting, the Tunçmatik combination panel provides easy access for emergency intervention thanks to its cover.

TECHNICAL SPECIFICATIONS

- IP66 protection
- 4P 40A 30mA residual current protection relay (IEC/EN61008-1)
- 3P 40A W-Automatic switch (IEC/EN 60898-1)
